

TECNIPESA SMART LABEL

TAILOR-MADE
MANUFACTURING

COMPLIANCE WITH
STANDARDS

PILOT TESTS

We offer different types of RFID Standard Labels that can be adapted to any logistic application. They are designed for a variety of working environments. We also have samples available for projects that require them.

Our Standard RFID Tags work with the following frequencies: HF (13.56MHz), NFC (13.56MHz ISO 14443 A NFC Forum) and UHF (860-960MHz). Complying with the main international standards.

Depending on the label memory required by your company, we can provide you with different inlay brands: Impinj, Alien, NXP, etc.

These labels are ideal for use in asset control, item counting, production part validation, traceability management and other applications.
